About Teijin Group

The Teijin Group celebrates its 100th anniversary in 2018, and now, based on our corporate philosophy of “Enhancing the Quality of Life,” “In Harmony with Society,” and “Empowering Our People,” we seek to become a company that supports future society as we approach the next century in our history. This means we will continue to create new value in order to offer solutions for the issues faced by humankind.

Future society will not simply be an extension of the present, but will bring rapid and significant change. Just as the Teijin Group has done over its past century, we aim to become an innovator that anticipates change instead of pursuing it. To accomplish this, we are expanding our materials business, which includes a diverse array of high-performance fibers, composites, resins, films and related products, and healthcare business, including pharmaceuticals and home healthcare equipment, as well as advancing into new fields by leveraging our competitive edge and key capabilities in these businesses. In the future, these two pillars together with support from our IT business will provide a core foundation of sustainable growth as we develop highly profitable new business through integration of these domains.

Our company’s establishment in 1918 was the direct result of persevering to develop and commercialize production technology for rayon, something which no one else in Japan had mastered before. The Teijin Group has already demonstrated its ability to continuously transform itself and grow, and now we can build upon that legacy. While respecting our diversity, valuing the personality of every individual and allowing each member of the group to demonstrate their unique abilities, we will ambitiously pursue ceaseless evolution to fulfill our vision.

 - a) We accept that you receive other scholarship.
 - b) Not obligated to join Teijin Limited.

Overview of the Teijin Scholarship Foundation

Teijin Ltd. Founder.
Seita Kumura
(1880-1951)

The Teijin Kumura Scholarship system was started to commemorate the 35th anniversary of Teijin Limited’s founding in 1953 and to honor the achievements of Seita Kumura, who established rayon manufacturing technology in its own right and is known as the “father of the Japanese rayon industry” The purpose of this Scholarship system is to cultivate young engineers and scientists who would succeed to and develop Mr.Kumura’s spirit of creative R&D and contribute to the development of our nation and society and the creation of culture. In July 1954, the company established the foundation "the Teijin Scholarship Foundation" for the scholarship system in order for the further development of the system. With its transition to public Interest Incorporated Foundation, it has been accredited by Prime Minister in October 2011. The essential spirit that has permeated the system since its establishment has not changed. The system is not run for the sake of one company and takes as its central aim the cultivation of the human resources that will be responsible for the development of national society. Because of this aim, recipients of scholarship loans are excused from repayment if they are involved in research at a university or public laboratory after graduation. In addition, scholarship loans are recognized if an applicant has done well at school, irrespective of economic conditions, etc., in order to cultivate the researchers who will be responsible for the science and technology of the future. Furthermore, since its founding, this system has never set mandatory restraints and has firmly maintained the essential qualities of the foundation. Until this point, about 1,600 people have been active in university research organizations andprivate companies.

1. History

June 1953
Teijin Limited established an educational scholarship system as a project to commemorate the 35th anniversary of the establishment of the company.
July 1954
The Education Minister permitted Teijin Limited to establish the Teijin Scholarship Foundation. The foundation continues to the present day.
October 2011
With its transition to public Interest Incorporated Foundation, it has been accredited by Prime Minister.

2. Aim

The foundation aims to cultivate human resources who will become aware of their mission as scientists and engineers and be responsible for the development of our nation and society and the creation of culture.

3. The Origins of the Names “Teijin Kumura Scholarship” and “Teijin Kumura Scholar”

The scholarship awarded by the foundation was named the “Kumura Scholarship” and the recipients of the scholarship “Kumura Scholars” in order to honor the achievements of Seita Kumura, who was the first person in Japan to establish rayon manufacturing technology and subsequently built the foundations for the development of the rayon industry, and to communicate those achievements eternally to later generations. To mark the 50th anniversary of this scholarship system, they have been renamed the “Teijin Kumura Scholarship” and “Teijin Kumura Scholars” respectively.

4. Project Details

Teijin Kumura Scholarship loans are awarded to graduate school students in technology-related disciplines.

(As of January 2018)

“Young people go overseas!”

~ Message from a Nobel Prize Laureate in Chemistry (2010) Dr.Ei-ichi Negishi ~

When I joined Teijin in 1958, Shinzo Oya the president at that time told, “Young people must go overseas. You will be able to speak three languages in 30 years, if you learn one language in 10 years. Then you will become world-class talent. ”The starting point that I was able to walk on such a way is in the word of President Oya. In the field of chemistry, the competition is worldwide, and our playground has extended across the world. Now, you have to look for the professor from the world and aim for the top in the worldwide competition. For the young people like you, I suggest you to go overseas aggressively. When you find your own “Dream”,please challenge it thoroughly until the truth is investigated. I look forward to your great success in the future.
