Millennium Club

We are recruiting English teachers. We have been taught by students from your university so far. Therefore, we are looking for new English teachers. If you are interested in teaching English, and would like to apply, please contact us.

1 Group Introduction

Our group's purpose is to be able to have daily English conversation while learning the grammar. We are about 10 people, all the members are Japanese from 19 to 70 years old. The class level is beginner-intermediate, and there are some beginners particularly in the English conversation.

2 Lesson contents

Firstly, we talk about the news of the weekend individually. You listen to each one of us, correct the grammatical mistakes and comment on our participation. Then we learn English along with the text which we prepared before. You start by reading, explain the content and its grammar. If we have extra time, we let our teacher free to come up with new activities such as role playing, singing songs, etc.
