

Report from Special Research Student

Nationality: India

Department: Mechanical Engineering

Period: October 2019 – December 2019

What motivated you to study at TUT?
Culture and technology
What kind of studies and research did you do at TUT? How much progress?
<u>Design and fabrication of microfluidic device and synthesis of gold nanoparticles in it. Finished two shapes of anisotropic nanoparticles using the device.</u>
Fun memories at TUT
Managing language is fun at some times.
Message to future visiting students
<u>Please try to learn few Japanese common words before visit Japan.</u>
