

Report from Special Research Student

Nationality: Mexico

Department: Mechanical Engineering

Period: March 2020 – August 2020

What motivated you to study at TUT?
Mainly, to learn about Japanese culture.
What kind of studies and research did you do at TUT? How much progress?
Thermoelectricity in ceramic materials; there was a little progress, but it was very important and significant, because it combines classical techniques and materials with a versatile technique to obtain a novel material property.
Fun memories at TUT
<ol style="list-style-type: none">1) Cicadas knocking the window at midnight2) Cats waiting outside D building3) Giant spiders in the shower, laundry and kitchen
Message to future visiting students
Please enjoy your stay in this quiet and beautiful place, it's very comfortable to study and relaxing.
