

## Report from Special Research Student

Nationality: Thailand

Department: Computer Science and Engineering

Period: March 2022 – June 2022

What motivated you to study at TUT?

TUT gives the opportunity to study the ab initio FMO calculation approach.  
This method is new knowledge for discovery of potential novel FabI1 inhibitors.

What kind of studies and research did you do at TUT? How much progress?

- *Ab initio* fragment molecular orbital (FMO) calculations were used to discover potential novel FabI1 inhibitors.
- My research at TUT was achieved for purpose of my research.

Fun memories at TUT

TUT is a modern university. The people are lovely and friendly.  
I have good memories at TUT.

Message to future visiting students

TUT is a very good university for me.  
TUT has a good culture.  
I want students to exchange at TUT.
