

## Report from Special Research Student

Nationality: Indonesia

Department: Architecture and Civil Engineering

Period: March 2022 – June 2022

What motivated you to study at TUT?

1. High Technology and Very Professional teacher.
2. Toyohashi University of Technology has an environmentalist college that can give me opportunity and facility to improve myself become an environmentalist and someone who can participate in environment in Indonesia and in this world

What kind of studies and research did you do at TUT? How much progress?

My research topic in TUT was Analysis of Phosphorus and Nitrogen Content in Tomato Greenhouse Wastewater in Toyohashi University of Technology.

I took tomato greenhouse samples in TUT, after that I did a laboratory test to measure the chemical content in the tomato greenhouse wastewater.

I already finished all of the research parameters in TUT.

Fun memories at TUT

I had a lot of fun memories during student exchange in TUT, namely :

I was joining J – Talk, I came to J-Talk every Tuesday. I got so many friends there that several of them right now be my best friend. Beside that, I was joining the badminton club. I felt happy and enjoy every single time during did a sport because of the friends.

My friends in my laboratory are my best friends. It felt sad when I had to leave TUT because I always spent my time with my friend their name are ■ and ■, Both of them are really my close friends until I die because they helped me from the first time I was in TUT until I was in the airport. They were accompany me to send me of to Indonesia.

Message to future visiting students

You have to enjoy every single time during the programs in TUT.

Don't forget to learn something new that you never learn before.
