

## Report from Short-term Visiting International Student

Nationality: Mongol

Department: Applied Chemistry and Life Science

Period: February 2020 – July 2020

What motivated you to study at TUT?

I came here in February, that time was B3 students went to internship and other students were studying hard for final exams and researches. Many students were staying late in library was motivated me for more study. And when Professor I was a introduced his previous and currently researches that was motivated to study more for master degree in Japan. Many people have inspired me well!

What kind of studies and research did you do at TUT? How much progress?

I did a research that Ru(II)-Pheox Catalyzed asymmetric cyclopropanation of ethyl diazopyruvate with styreneorganic chemistry catalyzed reaction My research was contained two big steps and took a month.

Fun memories at TUT

Even it was during student's busy time for final exams and spring vacation with COVID-19 I participated J-talk and Valentine Party. I made some new foreign friends and connected with Instagram and Line. We talked and played games in study room in international house. And made many fun memories with Mongolian students, too!

Message to future visiting students

Be open and sociable with others and make new friends. Life is delicious with adventure. Study hard and enjoy every little moment! Time management and always near with information is necessary.
