

## Report from Short-term Visiting International Student

Nationality: Mongol

Department: Applied Chemistry and Life Science

Period: February 2020 – July 2020

What motivated you to study at TUT?

TUT is a very welcoming to foreign students, and the rankings are a highest one of the national universities. Also, TUT encourage the all students, provide utilities to do research on any subject.

What kind of studies and research did you do at TUT? How much progress?

I have done the research about effective synthesis of cyclopropanation using catalyst and allylsilanes. All the experiments are done well, and products had the high yield, diastereoselectivity, enantiomeric excesses.

Fun memories at TUT

I have made a lot of Japanese and foreign friends and all the students are so polite and kind.  
The lunches and dinner were so delicious and cheap.  
We had a chance to see master's and doctor's thesis statements, and that was so interesting.

Message to future visiting students

TUT is full of politeness and possibilities. The environment and facilities are fully loaded so it is a great place to focus on the research. Enjoy there!
